

The image shows a template for the front of an A4 flyer, designed to be folded into three equal-width panels. The entire template is enclosed within a red border. Two vertical red dashed lines indicate where the flyer should be folded. Two vertical blue dashed lines define the outer edges of the content area. The central panel is the largest, while the two side panels are narrower. The text 'Flyers A4 Front (Folding)' is centered in the middle panel. On the right side, there are three labels with arrows pointing to the right: 'Bleed' (red), 'Cut Line' (black), and 'Safety' (blue). Each label has a corresponding line: a red line for the bleed area, a black line for the cut line, and a blue line for the safety margin.

Flyers A4 Front (Folding)

← Score

← Score

Bleed

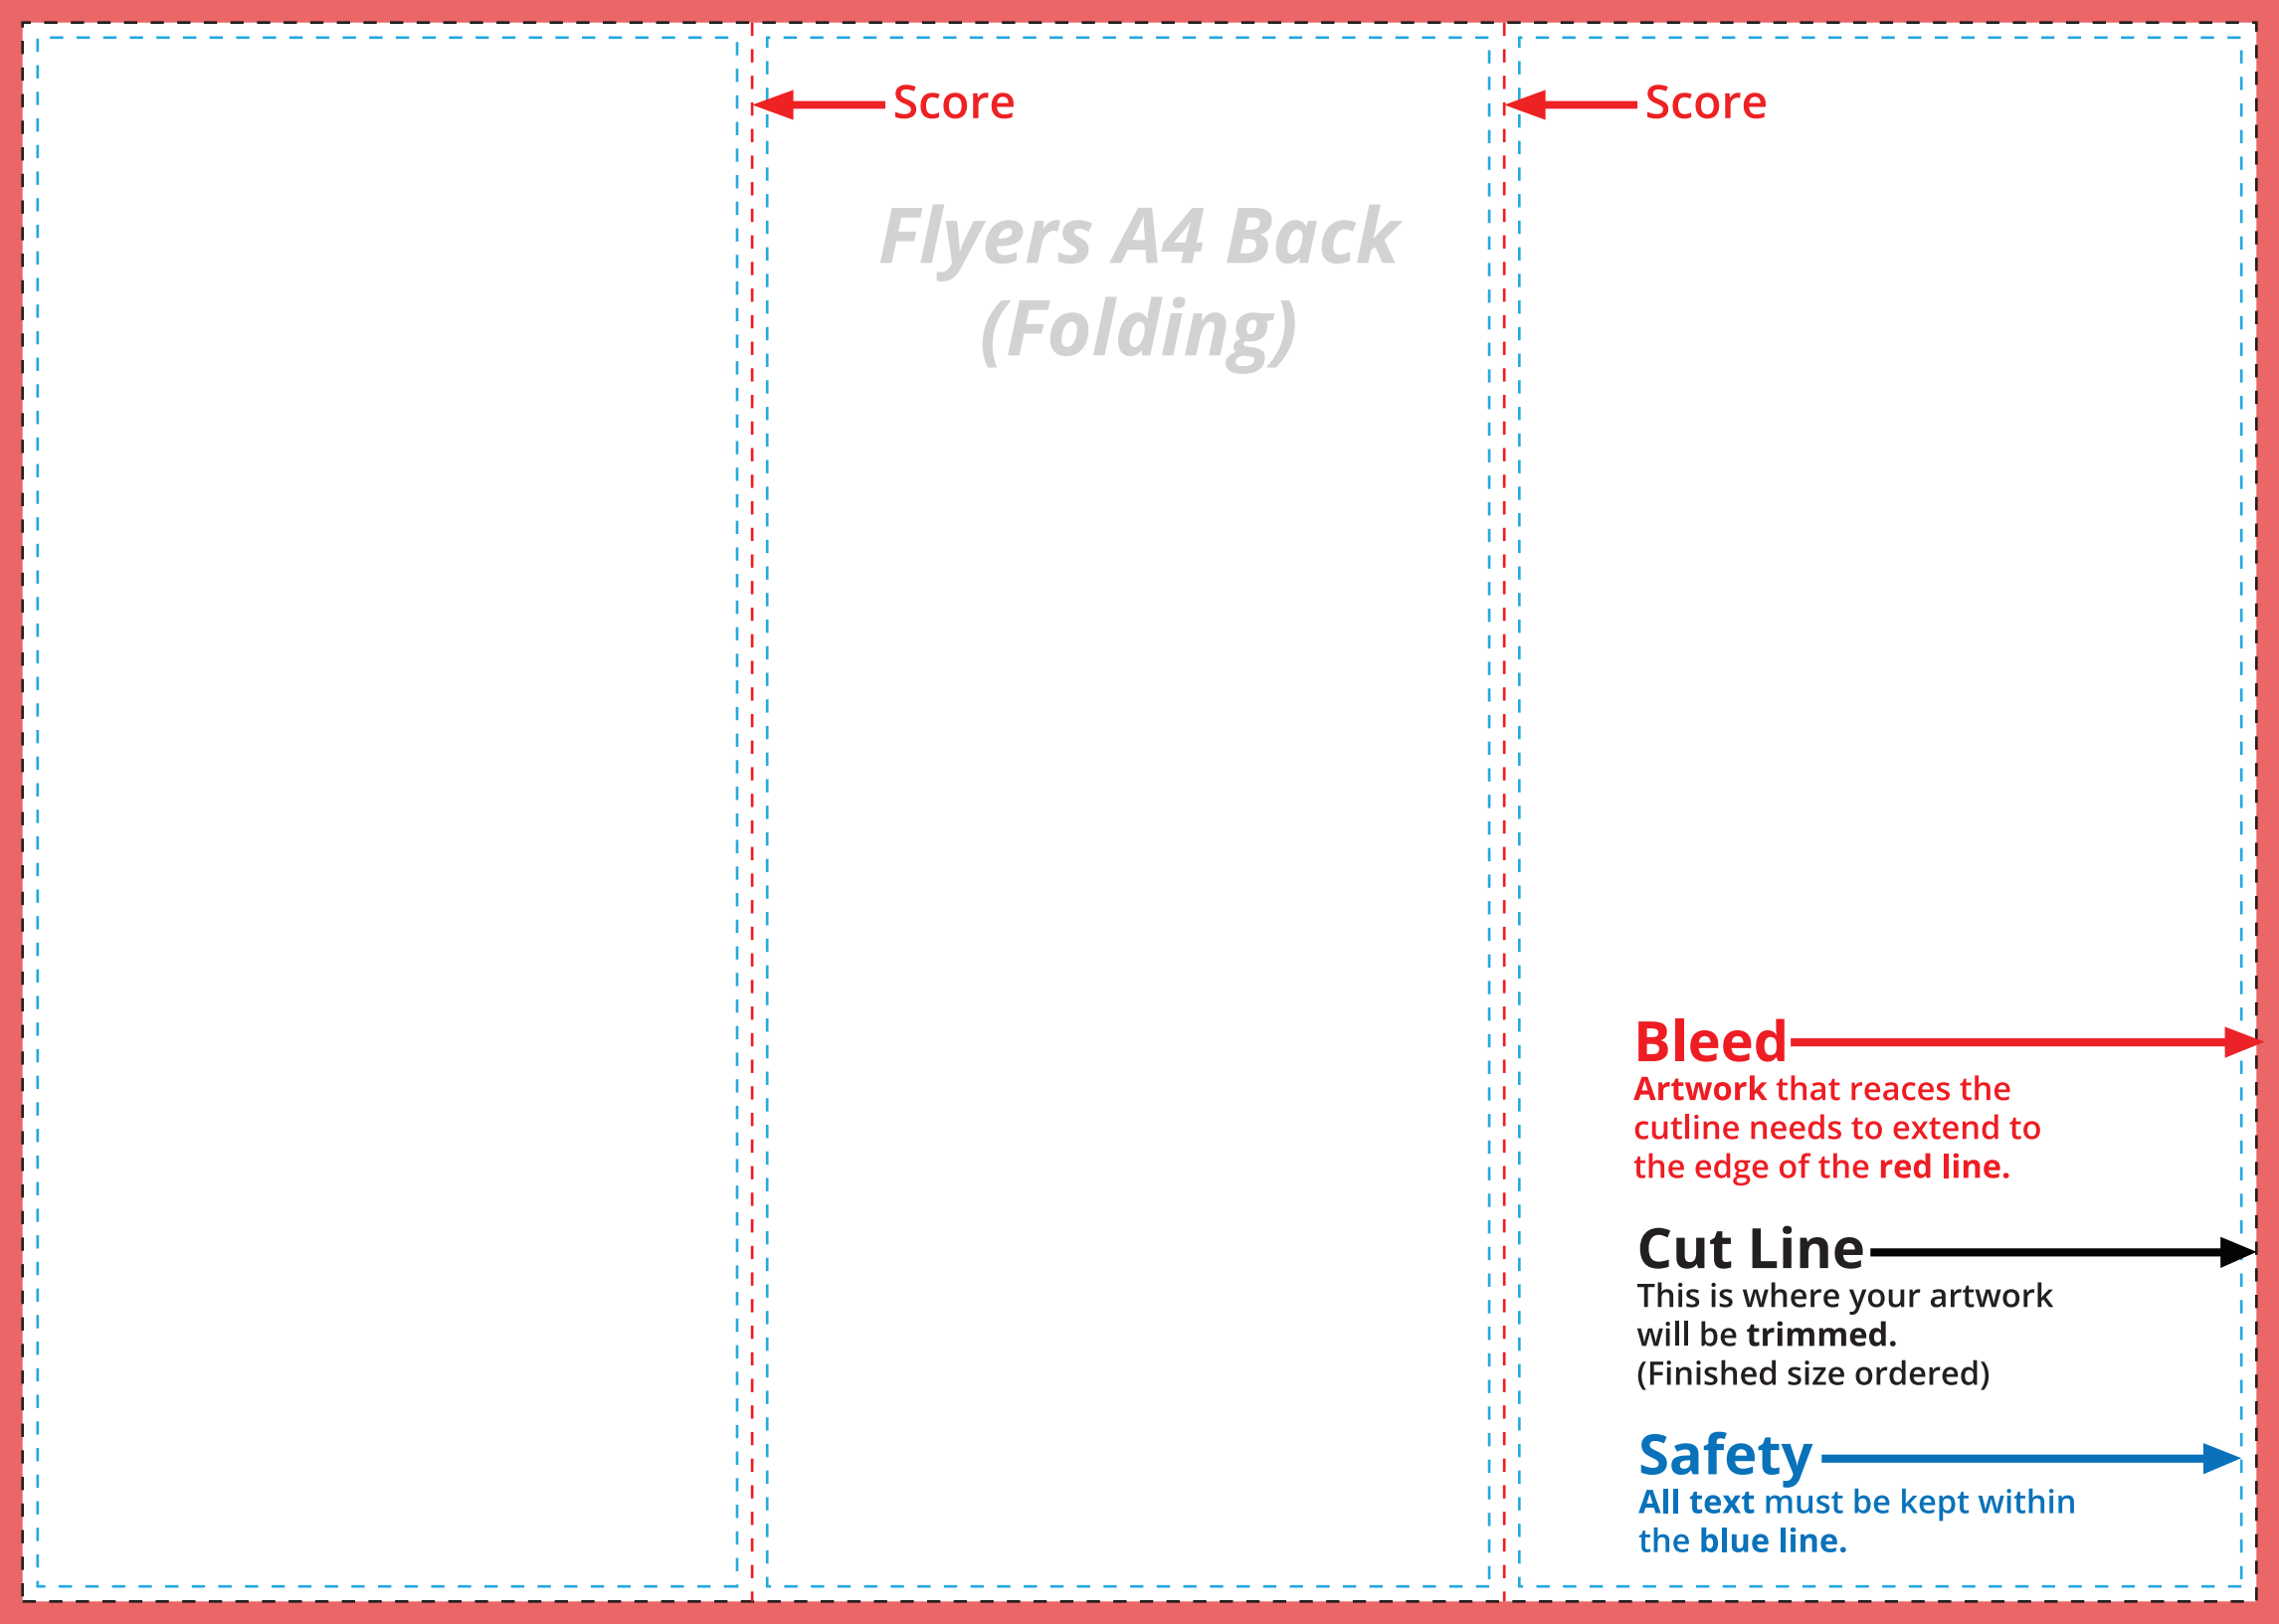

Artwork that reaches the cutline needs to extend to the edge of the red line.

Cut Line

This is where your artwork will be trimmed.
(Finished size ordered)

Safety

All text must be kept within the blue line.

Score

The diagram shows a template for the back of an A4 flyer. It features a central white area flanked by two light gray side panels. A vertical red dashed line runs down the center, indicating a fold line. Two vertical blue dashed lines are positioned on the outer edges of the gray panels, indicating where the flyer will be cut. Red arrows point from the text 'Score' to the red dashed line, and black arrows point from 'Bleed' and 'Cut Line' to the blue dashed lines. The text 'Flyers A4 Back (Folding)' is centered in the white area. The entire template is set against a solid red background.
